

AEG

ENERGIZING YOUR EVERYDAY

SOLAR SOLUTIONS PORTFOLIO

AEG

ENERGIZING YOUR EVERYDAY SINCE 1887.

WHAT IS THE FIRST THING YOU DO IN THE MORNING?

Open your eyes. Switch on the light. Stand up, and make yourself a good cup of coffee. Cook a healthy breakfast. Shower, put on clean clothes, and start full of energy into the new day that awaits. Were you aware that AEG has accompanied your every step?

By bringing the first electric bulbs (1887), the first electric cooker (1910), or the first washing machine (1958) into the homes of thousands of families, AEG has been energizing the everyday for almost 130 years with cutting-edge innovations and solutions to make life easier. Today, AEG is at your side with renewable energy solutions that make your home and workplace the control center of an intelligent and effortless energy revolution. Empowering you with sustainable energy solutions to reach your daily goals, whilst caring for the planet.

AEG PHOTOVOLTAIC SOLUTIONS

AEG photovoltaic products stand out from the crowd for their quality and reliability. Aesthetically pleasing and with innovation as standard, AEG's interconnected, smart solar devices allow you to be always an idea ahead in understanding solar energy and making it work for you, granting you full control over your PV system, its outputs and giving you peace of mind.

SOLAR SOLUTIONS

The Solar Solutions Group proudly brings AEG quality solar products to international markets. Solar Solutions Group is present in over 40 countries worldwide with a network of selected partners, each delivering a premium product and customer experience .

A woman with dark hair in a bun, wearing a white long-sleeved shirt, is seen from behind, stretching her arms upwards towards a bright window. The window is framed by dark, textured curtains. The scene is brightly lit, suggesting morning light. In the foreground, a white sheet or pillow is visible on a bed.

AEG

A POWERFUL START
TO A NEW DAY

A new day awaits, and the first rays of sunshine illuminate your solar plant. AEG inverters are ready to capture the power, transforming it into clean energy for your home appliances - from the toaster to the coffee machine, so you can start your day full of energy too.

For AEG solar inverters see page 8

A man wearing a white t-shirt and a dark denim apron is smiling while standing in a kitchen. He is holding a knife and appears to be cutting something. In the foreground, a silver laptop is open on a white countertop. Next to the laptop are several fresh vegetables, including cucumbers, a red chili pepper, and cherry tomatoes. The background features a brick wall with warm, ambient lighting from small pendant lights.

AEG

THE POWER
TO MULTITASK

- 
- ☒ Unplug your e-bike and ride to work.
 - ☒ Check the mail, write that report.
 - ☒ Cook your lunch, start the dishwasher.
 - ☒ Take the kids to training - and do the laundry.

You can rely on the clean energy from your AEG high efficiency solar modules to check off another task from your to-do list.

For AEG solar modules see page 7

A person wearing a green hooded jacket is holding a silver smartphone in their right hand. The background is a blurred city street with a yellow railing and a blue light in the distance.

AEG

YOUR PLANT AT
YOUR FINGERTIPS

Check your solar installation yields, a technical issue, or your investment - wherever you are. With AEG IMM smart monitoring technology, peace of mind and control are at your fingertips, whenever.

For AEG IMM Technology see page 9

A child is sleeping in a bed with blue and white striped bedding. A white teddy bear sits on a white nightstand next to a lit lamp. The scene is dimly lit, suggesting nighttime.

AEG

ALL DAY AND
ALL NIGHT LONG

The day was demanding. Get a good night's rest, while the AEG storage unit watches over your home and its needs. With the electricity you have harvested during the day, you can rest assured that your home runs on clean energy even at night.

For AEG energy storage see page 10

AEG

QUALITY YOU CAN RELY ON

THE AEG PRODUCT PORTFOLIO

The AEG product portfolio encompasses a wide range of photovoltaic products satisfying the need for flexibility and reliability in today's solar plant whatever the size of installation. AEG solar products - solar PV modules, inverters, storage and monitoring solutions- are manufactured from carefully selected and tested components to ensure the highest quality, reliable efficiency and a long product life.

Solar Solutions carefully selects suppliers according to rigorous audit processes carried out by both independent Quality Assurance bodies and Electrolux, to offer customers worldwide the reassurance of certified quality and due diligence they can rely on. AEG solar products are compliant with the latest standards to guarantee safety and reliability and are certified among others by TÜV Rheinland, TÜV Süd, and KIWA. The production facilities are certified according to ISO 9001, ISO 14001 and OHSAS 18001.

AEG PHOTOVOLTAIC SOLUTIONS

Each and every AEG solar product is designed with the user in mind to grant you a seamless product experience. AEG products make solar an essential part of your journey towards a greener and more sustainable future. For this reason, AEG solar products and Solar Solutions' commitment have been acknowledged by Electrolux with their Innovation and Sustainability Awards in 2016 and 2018.

Electrolux Innovation Award 2016
Sustainability Award 2016
Driving Sustainability Award 2018

SOLAR MODULES

HIGH EFFICIENCY

High efficiency mono-and polycrystalline solar modules

Monocrystalline: 60 cells up to 320 Wp
72 cells up to 380 Wp
Polycrystalline: 60 cells up to 290 Wp
72 cells up to 350 Wp

Silver frame / white backsheet (standard)
Silver frame / black backsheet (zebra)
Black frame / black backsheet (full black)

25 years performance warranty

ULTRA BLACK

Premium finish & premium aesthetics for a seamless „total look“.

Monocrystalline:
60 cells up to 310 Wp

Black frame / black backsheet
Black busbars (ultra black)

25 years performance warranty

GLASS-GLASS

Double glass solar modules for harshest environments

Monocrystalline:
60 cells up to 320 Wp

Black frame / transparent EVA

30 years performance warranty

HALF-CUT CELL TECH

Minimizing cell-to-module power losses for an efficiency boost

Monocrystalline:
120 cells up to 340 Wp

Silver frame / white backsheet (standard)
Black frame / black backsheet (full black)

25 years performance warranty

RELIABLE YIELDS, PREMIUM AESTHETICS

POWERFUL BUT CHIC

AEG solar modules are built to deliver clean energy over the whole lifespan of your solar installation. The rigorous tests that each solar module undergoes allows us to cover our products with a performance warranty of 25 years.

The careful material selection grants AEG solar PV modules sleek and chic looks that add an aesthetic value to any solar installation.

The advanced monitoring technology at module level optionally embedded in AEG solar panels (AEG IMM) allows you to gain full control of the performance of your products and of your overall installation, from anywhere you wish.

AEG SOLAR MODULES PORTFOLIO

The AEG solar module portfolio encompasses a wide range of products to flexibly fit different planning needs. It includes:

- High efficiency mono-and polycrystalline solar modules
- Ultra-black solar modules
- Double-glass solar modules
- Half-cut cell technology solar modules

AEG solar modules are
optionally equipped with AEG
IMM monitoring technology

SOLAR INVERTERS

SINGLE-PHASE <5 kWp

Single-phase (monophase) inverters for small-size residential installations

Power classes
1 MPPT: 750 Wp up to 5 kWp
2 MPPT: 4 kWp to 5 kWp

Matte black housing. Compact size
Global monitoring, RS485 + WiFi

10 years Product warranty

THREE-PHASE <10 kWp

Three-phase inverters for medium-size residential installations

Power classes
2 MPPT: 4 kWp to 10 kWp

Matte black housing. Compact size
Global monitoring, RS485 + WiFi

5 years Product warranty (extendable)

THREE-PHASE >30 kWp

Three-phase inverters for medium-size commercial installations

Power classes
2 MPPT: 12 kWp to 17 kWp
2 MPPT: 20 kWp to 30 kWp

Matte gray housing. Robust construction
Global monitoring, RS485 + WiFi

5 years Product warranty (extendable)

THREE-PHASE >60 kWp

Three-phase inverters for large-size commercial installations

Power classes
2 MPPT: 33 kWp to 35 kWp
2 MPPT: 40 kWp to 70 kWp

Matte gray housing. Robust construction
Global monitoring, RS485 + WiFi

5 years Product warranty (extendable)

ELEGANCE, POWER, CONTROL

DESIGNED TO PLEASE, MADE TO LAST

The AEG solar inverters belong to a new generation of grid-tied PV string inverters specifically developed for residential systems, safely converting the clean energy from your solar installation into energy for domestic use with your home appliances.

With eye-pleasing elegant style, the AEG residential solar inverters provide real time access to their operation and performance thanks to advanced mobile monitoring applications.

With their robust construction, the larger AEG three-phase inverter models are made to last. They are designed to ensure that any commercial installation deliver optimum yields over their lifetime, and safely feed the produced energy to the grid over many years.

AEG SOLAR INVERTER PORTFOLIO

The AEG solar PV string inverter portfolio flexibly covers the needs of modern residential installations and grid-tied commercial systems with:

- Compact single-phase and three-phase inverters for residential installations
- Robust three-phase inverters for medium and large commercial installations

Flexible DC-AC conversion
for all planning needs, reliable
performance over time

IMM TECHNOLOGY

IMM SOLAR MODULES

Solar modules with integrated AEG IMM monitoring technology

Integrated IMM is optionally available for all AEG mono- and polycrystalline solar modules. It monitors each module individually

AEG IMM Sensor-enabled smart junction box natively integrated in the solar module

25 years Performance warranty

IMM UPGRADE

AEG IMM smart monitoring upgrade for existing power plants

The AEG IMM Upgrade box can retrofit any non-IMM solar module to enable IMM smart monitoring

Connecting to the existing module junction box via MC4 connectors

5 years Product warranty

IMM HARDWARE

String Reader and Gateway for real-time plant data transmission

The String Reader performs high precision data reading from the strings. The Gateway reliably conveys module and string measurements to the IMM Web Portal

RS485 communication, DIN-rail mounting

2 years Product warranty (extendable)

IMM WEB PORTAL

Always knows what is going on in your solar plant, why, and what to do.

The IMM Web Portal analyses the data from the plant, detecting individual performance variations, and locating the exact source and reason of technical issues thanks to intelligent data analysis. It suggests troubleshooting solutions, and optimizes maintenance plans to maximise the investment and reduce the costs. Available as PC and mobile application

YOUR SOLAR PLANT AT YOUR FINGERTIPS

BE ALWAYS IN THE KNOW, OPTIMIZE, SAVE

Is your solar plant working as it should?
What might be the problem behind that energy loss?
Can you save costly maintenance programmes and make your plant work more efficiently?

You can! Gain full insight into the performances of each individual module and take control of your solar installation with AEG IMM (Individual Module Monitoring).

AEG IMM is a unique solar plant monitoring technology giving real time module level data allowing smart plant management run by artificial intelligence. With the intuitive visualizations and virtual assistance of the AEG IMM Web Portal, you have your power plant at your fingertips - if you want to check a technical issue, organize plant maintenance, optimize your investment and save in the process. Enjoy the peace of mind given by smart monitoring: you are in control.

AEG IMM SMART MONITORING TECHNOLOGY

- CONTROL your power plant performance thanks to deeper system understanding
- TRACK technical issues in your power plant down to the specific single module location
- DIAGNOSE the root cause of downtime and low efficiency thanks to vast data analysis capability
- BE INFORMED of developing problems with real time alerts
- REDUCE maintenance interventions and increase their precision

Full control over power plant performances with AEG IMM's smart monitoring

ENERGY STORAGE

STORAGE UNIT S

A reliable energy source with premium aesthetic for your home

Nominal storage capacity 3.84 kWh
Usable storage capacity 3.45 kWh
Lithium battery (LFP)
Integrated hybrid inverter
Dimensions 700 x 340 x 1230 mm
Matte black / Matte white housing, LCD
Product Warranty: 6000 cycles

STORAGE UNIT M

Long-lasting charge and sleek looks, providing energy for all house needs

Nominal storage capacity 7.68 kWh
Usable storage capacity 6.90 kWh
Lithium battery (LFP)
Integrated hybrid inverter
Dimensions 750 x 565 x 1330 mm
Matte black / Matte white housing, LCD
Product Warranty: 6000 cycles

BALANCE AND POWER, WHENEVER YOU NEED

ADJUSTING TO YOUR DAILY NEEDS

AEG energy storage solutions allow you to produce and use clean energy at your own tempo - day and night. It helps you save energy for the time you wish to use it, and when you need it the most.

The hybrid inverter integrated in the storage unit allows you to flexibly use power from your solar installation, using it with your home appliances, feeding it to the grid or saving it for later use.

From daily home appliance management to power outages, AEG storage solutions save, balance and smoothly redistribute power from your solar installation, granting you clean energy and peace of mind wherever you need, whenever you need.

AEG ENERGY STORAGE PORTFOLIO

The AEG energy storage units are scalable and currently available in two capacities

- 4 kWh for small-size installations
- 8 kWh for medium-size installations

Let the sun shine at night. Your AEG storage unit saves energy during the day for nighttime use

WORLDWIDE REFERENCES

WORLDWIDE REFERENCES

Since the start up, Solar Solutions has seen exceptional year-on-year growth. From the first signature projects in the UK (13.54 MWp, 2015), to the largest solar rooftop in Cuba (2 MWp, 2017); from the latest projects with AEG IMM technology in Hungary (1.7 MWp, 2018-2019), to the medical and training facilities of GTAG (the German Technical Advisory Group of the German armed forces Bundeswehr); from a multitude of elegant rooftop projects powering private homes in the Netherlands or universities in Brazil, AEG quality products are being successfully deployed globally thanks to a solid partner network.

Whether by helping schools in India, like Sacred Heart in Kerala, gain more energy independence, or by recapitalizing assets by transforming dilapidated rural buildings into smart barns through AEG IMM technology, AEG products are contributing day by day to a greener economy and a more sustainable future.

A GROWING PARTNER NETWORK

From Europe to Middle East, and from Africa to Latin America, our AEG partners are putting all their professionalism and passion at the service of our customers, providing you with the same AEG customer experience that has proven so popular globally. Today, the AEG distribution network counts partners in over 40 countries worldwide.
